June 22, 2016

Dear Pacific Grove Resident,

The City of Pacific Grove will be conducting a very important Capital Improvement Program stormwater project, 15th and Laurel Stormwater Improvement project, that will have some effects on your neighborhood.

The purpose of this project is to make necessary stormwater infrastructure improvements to continue to protect our coastal waters and preserve Pacific Grove's Area of Special Biological Significance by repairing storm drain inlets on the South West and South East end of the 15th and Laurel intersection.

In addition to fixing the storm drain inlets, the project will consist of sidewalk, access ramps and pavement reconstruction. The storm drain inlets will be moved to provide ample space to install new curb ramps and allow the new drain lines to be hooked up to the City's 48 inch main.

Construction work for this important project will begin on July 10, 2017. During this time there will be some disruption to your street. We anticipate work will conclude the first week of August.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel Gho", with a long horizontal flourish extending to the right.

Daniel Gho
Director of Public Works
